C-SERIES (H: 865 X W: 495 X D: 560 MM – WITHOUT BASE CABINET)

// EXCLUSIVE QUALITY AND DESIGN

The new C-series premium compact machines meet the highest demands in terms of design, quality and taste. Whether it's coffee specialties made from the whole bean or soluble instant products: both versions deliver outstanding coffee pleasure of the highest standard high-quality 15.6" full HD touchscreens ensure optimum usability for product selection and menu navigation, visible coffee bean and product containers complete the elegant design with front panels in polished aluminium, glass and stainless steel. With the optional base cabinet, the compact table tops can be adapted to your individual space requirements.

// EASY TO SERVICE AND LOW-MAINTENANCE

Equipped with the patented innovative Gerhardt MMX mixing technology, the new C-series offers clean processing of soluble products such as milk powder or drinking chocolate, clean steam management while at the same time reducing the use of goods. The self-contained system prevents contamination inside the machine and delivers excellent mixing results for all products in exceptionally high quality.

// ONE DEVICE. MANY POSSIBILITIES

The Gerhardt C sets high standards with innovative components and optional features. The new, more compact design offers a larger capacity than the previous series. Either one or two high-quality Swiss 62 mm ceramic disc grinders guarantee an excellent aroma. The individually adjustable ESX brewing group with intelligent control technology ensures consistently high product quality when preparing different coffee recipes. In addition to sufficient space for the required payment modules, one or even two types of bean coffee are possible – in addition to up to five instant containers depending on the model. The mobile coffee shop is optionally available with a fully automatic cup dispensing system for single use paper or plastic cups.

// QUALITY, MADE IN NÜRTINGEN

In addition to excellent design, the energy-efficient premium compact machines convince through sustainable quality, maximum functionality and economy. Select materials and the best possible processing at the Nürtingen, Germany site guarantee trouble-free operation, as does the use of sophisticated components developed in-house.

CLEAN SOLUTION: THE PATENTED MIXING TECHNOLOGY GERHARDT MMX, TO MINIMIZE THE MAINTENANCE
